Programme / Functions

Cleaning functions

Pyrolytic

Hob options

Control lock	Yes	Limited Power	3000, 4500, 7400 W
Limited Power	Yes	Consumption Mode in W	
Consumption Mode		Multizone Option	Yes

Hob technical features

Total no. of cook zones 4

Front left - Induction - single - 2.10 kW - Booster 2.30 kW - 21.1x19.1 cm Rear left - Induction - single - 1.60 kW - Booster 1.85 kW - 21.0x19.0 cm Rear right - Induction - giant - 2.10 kW - Booster 2.30 kW - Ø 21.0 cm Front right - Induction - single - 1.20 kW - Booster 1.40 kW - Ø 18.0 cm

No. of cooking zones with Booster	4	Minimum pan diameter indication	Yes
Automatic switch off when overheat	Yes		Yes Yes
Automatic pan detection	Yes		

Main Oven Technical Features

No. of lights Fan number Net volume of the cavity Gross volume, 1st cavity		door glasses Safety Thermostat	4 3 Yes
Cavity material No. of shelves	Ever Clean enamel 5	Heating suspended when door is opened	Yes
No. of shelves Type of shelves	5 Metal racks	Cooling system	Tangential
Light type Light Power	Halogen 40 W	Door Lock During Pyrolisis	Yes
Cooking time setting	Start and Stop	Usable cavity space dimensions (HxWxD)	360X460X425 mm
Light when oven door is open	Yes	Temperature control	Electro-mechanical
Door opening Removable door	Flap down Yes	Lower heating element power	1200 W
Full glass inner door Yes Removable inner door Yes	Yes	Upper heating element - Power	1000 W
	Tes	Grill elememt Large grill - Power	1700 W 2700 W

Circular heating element 2000 W - Power Grill type Electric

Options Main Oven

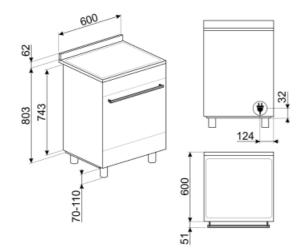

Timer	Yes	Minimum Temperature	50 °C
End of cooking acoustic alarm	Yes	Maximum temperature	280 °C

Accessories included for Main Oven & Hob

Rack with back and side	2	Grill mesh	1
stop		Telescopic Guide rails,	1
40mm deep tray	1	partial Extraction	

Electrical Connection

Electrical connection rating	10400 W	Type of electric cable installed	Yes, Single phase
Current	46 A	Additional connection	Yes, Double and Three
Voltage	220-240 V	modalities	Phase
Voltage 2 (V)	380-415 V	Frequency	50/60 Hz
-		Terminal block	5 poles

Not included accessories

AIRFRY

Air fryer rack AIRFRY . Ideal for recreating traditional frying in the oven, but with fewer calories and less fat. It allows you to cook quickly and simply dishes such as French fries, fried vegetables and fish, ensuring perfect browning and crispiness.

GTP

Partially extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they guarantee stability and facilitate the smooth extraction of the trays.

κιτρβχ

BNP608T

Height reduction feet (850mm), st/steel, for Sinfonia and Master cookers (845-856mm)

SFLK1 Child lock

PRTX

Refractary pizza stone with handles. D=35cm Not suitable for microwave ovens. Suitable for gas ovens, to be put on the griddle.

GRILLPLATE

Universal griddle for induction, gas, ceramic and electric hobs. Non-stick surface ideal for cooking meat, cheese and vegetables. Dimensions: 410 x 240 mm.

KITC6X

Splashback, 60cm, stainless steel, suitable for Master and Sinfonia cookers

BN620-1

Enamelled tray suitable for 45cm and 60cm ovens. Depth 20 mm. Perfect for a wide range of savoury and sweet baking.

BBQ

Double sided plate BBQ. Suitable for recreating succulent and crispy dishes in the oven with the typical taste of grilled cooking. The ribbed side is particularly suitable for meats and cheeses. The smooth side for fish, seafood and vegetables.

PALPZ

Pizza shovel with folding handle. Dimensions L31.5 x H32.5 cm. Easy and convenient to use and store. Perfect for serving pizza, bread and savory pastries in a safe and professional way.

SCRP

Non-scratch hob scraper - suitable for induction and ceramic hobs

TPKPLATE

Universal plate for induction, gas, ceramic and electric hobs. Non-stick surface ideal for cooking fish, eggs and vegetables. Dimensions: 410 X 240 mm.

GTT

Totally extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they guarantee stability and facilitate the smooth extraction of the trays.

BN640

Enamelled tray suitable for 45cm and 60cm ovens. Depth 540 mm. Perfect for cooking and roasting meat and fish in sauces. Also ideal for experimenting with lighter and crunchy side dishes

SMOLD

Set of 7 silicone moulds for ice creams, ice lollies, pralines, ice cubes or to portion food. Usable from -60°C to +230°C

Symbols glossary (TT)

- P
- Power booster: option allows the zone to work at full power when very intense cooking is necessary.

Air cooling system: to ensure a safe surface temperatures.

3

ECO-logic: option allows you to restrict the power limit of the appliance real energy saving.

- Ever Clean Enamel: Ever Clean enamel is applied electrostatically, corner to corner and edge to edge to prevent cracking or cracks over time. It is a particular pyrolytic enamel, resistant to acids which, in addition to being pleasantly bright, promotes greater cleaning of the oven walls, thanks to its lower porosity. It is baked at over 850 ° C and slowly polymerized at a scientifically determined rate to ensure uniform depth and strength Ever Clean enamel creates an impeccable finish both on the inside of the oven and on the trays, making the surfaces of the oven incredibly easy to maintain over time as it reduces the adhesion of fat during cooking
 - Fan assisted base: the mix of fan and lower heating element alone allows to finish cooking foods already cooked on the surface but not internally more quickly. This system is recommended to finish cooking foods that are already well cooked on the surface, but not internally, which therefore require a moderate higher heat. Ideal for any type of food.

Static: Traditional cooking suitable for the preparation of one dish at a time. The fan is not active and the heat comes from below and from above at the same time. Static cooking is slower and more delicate, ideal in order to get well cooked and dry dishes even inside. Ideal for cooking all types of roasts, fatty meats, bread, filled cakes.

ECO ECO: low energy consumption cooking: this function is particularly suitable for cooking on a single shelf with low energy consumption. It is recommended for all types of food except those that can generate a lot of moisture (for example vegetables). To achieve maximum energy savings and reduce time, it is recommended to put the food in the oven without preheating the cooking compartment

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

Quadruple glazed: Number of glazed doors.

Α

A: Product drying performance, measured from A+++ to D / G depending on the product family

Fingerprint proof stainless steel: Fingerprint proof stainless steel keeps stainless steel looking as good as new.

1	C
I	
1	

Fan assisted: Intense and homogeneous traditional cooking, also suitable for complex recipes. The fan is active and the heat comes from below and from above at the same time. Ventilated cooking ensures a faster and more homogeneous result, leaving fragrant foods outside and moister inside. Ideal for baked pasta, biscuits, roasts and cobblers.

Circulaire: it is the perfect function for cooking all types of dishes in a more delicate way. The heat comes from the back of the oven and is distributed quickly and evenly The fan is active. It is also ideal for cooking on multiple levels without mixing smells and flavors.

Grill: Very intense heat coming only from above from a double heating element. The fan is not active. Provides excellent grilling and gratinating results. Used at the end of cooking, it gives a uniform browning to dishes.

***	Half grill: For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.	(%)	Fan grill: very intense heat coming only from above from a double heating element The fan is active. It allows the optimal grilling of thickest meats. Ideal for large cuts of meat.
	Turbo: the heat comes from 3 directions: above, below and from the back of the oven The fan is active. It allows quick cooking, even on several shelves without mixing the aromas. Ideal for large volumes or foods that require intense cooking.	0	Giant zone: The giant zone offers extra space and flexibility.
STOP °C∓	Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.	() ()	Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.
旦	All glass inner door: All glass inner door, a single flat surface which is simple to keep clean.	H	The inner door glass: can be removed with a few quick movements for cleaning.
¢ ¢	Side lights: Two opposing side lights increase visibility inside the oven.	P	PYROLYSIS - AUTOMATIC CLEANING FUNCTION: the oven heats up to a temperature approaching 500 ° C and chars grease and food residues into a fine ash that can be easily wiped off with a damp cloth. At such a high temperature, the door locks automatically for safety, while the temperature of the door remains controlled so it is safe to touch User adjustable function based on the level of dirt present in the oven.
Н	Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.	.5	The oven cavity has 5 different cooking levels.

Telescopic rails: allow you to pull out the dish and check it without having to remove it from the oven entirely.

70 IR

The capacity indicates the amount of usable space in the oven cavity in litres.
