### Conical burrs

Conical stainless steel grinders for better consistency of the chosen grain size

### Versatile

Up to 30 degrees of fineness to grind at different grind grades, suitable for multiple types of extractions: Mocha, Frenchpress, Filter coffee or for espresso machines

### Grinding Function

Coffee grinder: the true aroma of coffee starting from the grinding performed at the moment

### CGF11 marketing description HoC

#### CGF11 HoC Marketing Description

There are many methods to brew an excellent coffee-based drink at home, but true connoisseurs know that whatever type of extraction is preferred, it is important to freshly grind the coffee beans. Freshly-ground coffee has a much more intense aroma and flavour than ready-ground coffee.

Whether you use an espresso or a filter coffee machine, a moka coffee pot or a French press: each method requires its own grind size, and the CGF11 multi-functional coffee grinder enables you to select the correct setting (Fine, Medium, Coarse) from 30 different grind sizes.

Its stainless steel conical grindstones guarantee an even grind that preserves all the coffee aromas without altering its flavour: simply select the type of grind and the desired amount of coffee. It will stop automatically as soon as the quantity of ground coffee is ready.
