## Symbols glossary

 <p>Aquatest measures the clarity of the water during an auto program, and automatically ensures the minimum consumption of water and energy.</p>	 <p>COMM_HEIGHT_82_72dpi</p>
 <p>Delay Timer: The delay timer can postpone the start of the program by up to 24 hours.</p>	 <p>Models with new Flexi Fit hinges are able to be installed in kitchens with a plinth of just 5cms. With this new hinge design, the panel has a sliding movement from the bottom to the top, avoiding any possible interference of the panel with the plinth.</p>
 <p>Noise Level: Excellent insulation and special devices keep noise to a minimum.</p>	 <p>Eco: Eco, this economic wash programme uses a low amount of water and energy in order to provide the most environmentally friendly cleaning option.</p>
 <p>Normal programme: The normal programme is suitable for normal degrees of dirt for everyday use.</p>	 <p>Soak programme: The soak programme provides a rinse to prevent dirt from drying.</p>
 <p>The symbols show the number of plate settings of the dishwasher.</p>	 <p>Total Acquastop: In addition to the partial Acquastop protection present in all Smeg dishwashers, some models have an electronic device fitted to the water intake hose, which monitors water levels in the machine, detects leaks in the hose and switches off the water supply immediately when necessary.</p>
 <p>...</p>	 <p>...</p>
 <p>...</p>	 <p>Wash cycle for normally soiled mixed loads such as dishes and pans, even with dried-on residues. When this program is selected, the dishwasher recognises the type of dirt and automatically adjusts the washing parameters as appropriate.</p>
 <p>This option provides special care for a delicate load. It prevents rapid changes in the wash temperature of the selected programme and reduces it to 4</p>	 <p>Programme suitable for washing and drying heavily soiled items with encrusted residues.</p>
 <p>Option which improves the washing results of the selected programme. It increases the wash temperature and duration.</p>	 <p>Option which provides better cleaning results by keeping the temperature between 65 and 70°C for at least 10 minutes during the last rinsing phase.</p>
 <p>Energy efficiency class D</p>	 <p>System WaterSave ensures the best washing results with minimal water consumption depending on the model of dishwasher.</p>

The work aimed at continuous improvement has allowed the creation of the second generation of the Inverter motor 2.0, characterised by greater efficiency and durability over time, which allows very high performance and a lower energy consumption and noise level.
